

i think this is so ridiculous. i PAY for XM radio, and i think you should have nothing to do with what i get to listen to on it. If you want people to listen to local radio, then do what any normal business competitor would do. make it better. i mean, i pay for xm, when local radio is free. what does that tell you? local radio stations suck. plain and simple. you can't blame XM for that. it's none of your or anyone else's business what i listen to ,ESPECIALLY when i am paying for it. you represent what is wrong with this country. the government should have no place in telling people how to live their lives. there are PLENTY of more important things you people should worry about.
